

1.6+ Years Experience

Flutter Developer | Mobile App Developer | Frontend | Android & iOS | UI/UX |

Banti Rathod | Hyderabad, India | +91 70997911432 | bantirathodtech@gmail.com | linkedin.com/in/bantirathodtech | github.com/bantirathodtech

Professional Summary

Results-oriented Flutter Developer with over 1.6 years of experience building high-performance Android and iOS applications using Flutter. Delivered 7+ production apps. Expert in clean architecture (MVVM/MVC), state management (Provider), and scalable UI design. Collaborated with backend engineers, designers, and QA teams to boost delivery speed by 30% and app stability by 40%. Passionate about code reusability and optimizing UX through innovative solutions.

Technical Skills

- *Languages: Dart*
- *Frameworks & Libraries: Flutter, Provider, Bloc(basic), Material UI, Dio, Hive (Learning).*
- *Backend & API: Firebase (Auth, Firestore, Storage), REST APIs, GraphQL, JSON Parsing*
- *Tools: Android Studio, Xcode, Visual Studio Code, Postman, Figma (Learning)*
- *Testing: Unit Testing, Widget Testing,*
- *Features: Push Notifications, Payment Gateway (Razorpay), Google Maps, Geolocation, SharedPreferences, Flutter Web*
- *Architecture: Clean Architecture, Component-based Architecture, Microservices*
- *Soft Skills: Team Leadership, Problem-Solving, Communication, Collaboration, Time Management, Adaptability, Stakeholder Management*

Professional Experience

Flutter Developer | Exceloid Soft Systems Pvt. Ltd. | Hyderabad, India | December 2023 - Current

- Developed 4 responsive Flutter applications
- Incorporated RESTful and GraphQL APIs with 99.5% accuracy for real-time data updates, optimizing app performance.
- Improved memory efficiency by 25% using Provider for state management and scalable architecture.
- Processed over 5,000 monthly Razorpay transactions with a failure rate below 0.5%.
- Deployed apps to Google Play Store and App Store using App Store Connect, streamlining release cycles.
- Implemented Google Maps-based route optimization, enhancing delivery tracking efficiency by 20%.

- Conducted unit and widget testing for over 90% code coverage, reducing app crash rates by 35%.
- Collaborated with QA and backend teams to resolve 100+ pre-release defects, improving app stability by 40%.

Projects:

CW ERP Solution | Commercial Mobile Application

- Upgraded an ERP app for inventory management, billing, and analytics using Flutter and Firebase, improving processing speed by 35%.
- Integrated REST APIs and Provider for real-time updates, reducing data sync latency by 40%.

CW Food Ordering App | Commercial Mobile Application

- Developed a full-stack food ordering platform with real-time order tracking, earning a 4.5+ Play Store rating.
- Implemented geolocation and Google Maps, improving delivery efficiency by 25% and reducing support queries by 30%.

SUNLIT - Vehicle Sand Transport App | Client Mobile Application

- Created a QR-based transport management system, reducing checkpoint entry errors by 80%.
- Configured REST APIs and SharedPreferences for secure offline data persistence, improving reliability by 90%.

DARSANANI - Indian Travel Guide | Post-Course Project

- Designed a travel planning app with sightseeing and cost estimation, improving plan accuracy by 60% via user feedback.
- Integrated Google Maps API for route mapping, reducing user confusion by 40%.

AMEWKART - E-Commerce App | College Final Year Project

- Built an e-commerce app with wishlist, filtering, and cart features, achieving 95% feature coverage.
- Merged Firebase Authentication and Firestore for secure login and real-time product updates, supporting over 100 test users.

Education

***Bachelor of Engineering in Computer Science | University of Nagpur | Nagpur, India
2019 - 2022 | CGPA: 7.7/10***

Certifications

- Android App Development, WsCube Tech, 2022
- Flutter Development Masterclass (Self-Paced), 2023
- Git and GitHub, Codecademy, 2023
